## New for Abila netFORUM Pro in March, 2017

## **General Updates**

These are the general updates and improvements to netFORUM Pro for **March**, **2017**. More information is available in the online help.

#### **Updates to New Event Registration Wizard Session Selection Step**

A new Event Registration Wizard is being developed for use when registering for an event on eWeb.

**Important!** To preview the new Event Registration Wizard, contact Abila Support to enable the EwebShowNewEventRegistrationWizard system option. This system option is disabled by default. Your System Administrator can then turn the preview of the new Event Registration Wizard on and off by using the Client System Options Setup page. The new Event Registration Wizard now supports event registration for individuals on eWeb and event registrations that require the collection of demographics or that have education credits. Future releases of the new Event Registration Wizard will support group registrations on eWeb.

The new **Event Registration Wizard** now more clearly displays event sessions making it easier for event registrants to correctly register themselves and their guests for the correct event sessions.

Please click on the names below to select sessions for them

This product enhancement was introduced into netFORUM Pro as a direct result of customer usability feedback.

#### **New Enhancement Request Portal**

A new enhancement request portal called **Ideas** is now provided with netFORUM Pro that allows users to directly collaborate with Abila concerning their product enhancement requests .

#### To proceed to the Ideas Portal page:

Click the **Ideas** *Click Here to Continue* button.

#### The netFORUM Pro Ideas Portal page displays.

### **MIP Integration**

netFORUM Pro now supports a new financials export CSV file format from netFORUM Pro to our best of breed fund accounting solution, MIP. This enables you to share data between both your netFORUM Pro and MIP systems. Contact Abila Support for more information about enabling this feature.
